PROFESSIONAL SUMMARY

Frontend Developer | 7.10 Years of Experience Innovative Frontend Developer with around 8 years of expertise in designing and building dynamic, scalable, and high-performance web applications using React.js, Redux, React Hooks, Node.js, and JavaScript. Adept at collaborating with cross-functional teams to deliver robust software solutions within tight deadlines.

- **Technical Excellence:** Proficient in modern JavaScript frameworks, RESTful APIs, and performance optimization for seamless user experiences.
- **Collaborative Approach:** Skilled at working with teams of varying sizes and technical backgrounds to align solutions with business objectives.
- **Professional Strengths:** Highly self-motivated, quick to adapt to emerging technologies, and equipped with strong analytical and problem-solving skills.

TECHNICAL SKILLS

- Frontend Development: React.js, Redux, React Hooks, JavaScript- (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Material-UI, Shadcn-UI, Magic-UI, Ant Design, Lovable
- Backend Development: Node.js, Express.js.
- Databases: MongoDB
- DevOps: FileZilla
- Code Quality & Security: SonarQube, ESLint, Prettier
- Version Control & Collaboration: Git, Bitbucket, Jira, Confluence
- API Development & Testing: REST APIs, Postman, Unit Testing (Jest)
- UI/UX Optimization: Responsive Design, Component-Based Architecture, Performance Tuning
- Development Methodologies: Agile (Scrum), Kanban, Waterfall

WORK EXPERIENCE

Sr Software Developer, Gem Source IT Consulting pvt Lmt — Oct 2025 - Present

- Working for Infosys under the payroll of gemsource.
- Currently contributing to the Aetna ID Card Excellence project as a senior software developer.

Sr Software Developer, I Spatial Techno Solutions — Apr 2024 - Sept 2025

- Spearheading front-end development and deployment for multiple projects, delivering high-quality solutions with efficiency and precision.
- Mentoring junior developers in React.js, JavaScript and Nodejs, fostering their technical growth and strengthening team expertise.
- Leading technical discussions, conducting code reviews, and ensuring adherence to front-end standards and best practices.

Technology Analyst, Infosys Limited — Jan 2024 - Mar 2024

- Joined Infosys at the Bangalore location as a Technology Analyst.
- After interviewing for a new project role, the position was put on hold, leading to my transition out of the organization.

Systems Engineer, Tata Consultancy Services — Nov 2021- Jan 2024

- Responsible for setting up and building projects using React.js, Redux, JavaScript, HTML, CSS, Material UI, and React Router to create robust and dynamic web applications.
- Involved in implementing security measures for web applications, including SonarQube setup to ensure code integrity and vulnerability management.

Software Developer, Innova Solutions Pvt Ltd — Jan 2021- Nov 2021

- Worked for TCS as client from January 13 - 2021 to November 5 - 2021, contributing to key projects and gaining valuable experience.
- Transitioned to a permanent position with TCS on their direct payroll, reflecting my contributions and offering long-term career growth opportunities.

Software Development Engineer, Transin Logistics Pvt Ltd — Sept 2018- Dec 2020

- Designed and developed a seamless, user-friendly interface for transporters to manage their daily trips, integrated with a finance management platform.
- Leveraged React.js, Redux, JavaScript, HTML, CSS, Ant Design, Material-UI, and React Router to build a responsive, intuitive, and visually appealing application.

EDUCATION

Master Of Computer Applications - 77% — 2015 - 2018
P.B.Siddhartha College Of Arts & Science,Vijayawada, Krishna.

Bachelor Of Science - Mecs - 66% — 2012 - 2015
Sri Harshini Degree College, Ongole, Prakasam.

Intermediate - 86% — 2010 - 2012
Andhra Pradesh Residential Junior College, Venkatagiri, Nellore.

PROJECTS

ID Card Excellence-Aetna

Oct 2025 - Present

- Developed and maintained Aetna's ID Card Excellence application, enabling the generation of insurance ID cards and copay details through a responsive, user-friendly interface using React.js, Redux, JavaScript, HTML, CSS, and React Hooks.
- Designed and implemented application configurations and override mechanisms, improving flexibility, maintainability, and support for evolving business requirements.
- Established SonarQube quality gates, automated code coverage reporting, and integrated Playwright for end-to-end UI testing, significantly enhancing code quality, test automation, and release reliability.

Open Data Platform

Apr 2024 - Sept 2025

- Open Data Platform designed to provide seamless, real-time data access to users across various devices and platforms.
- Built with React.js and Redux, ensuring efficient state management and responsive, dynamic interfaces for an enhanced user experience.
- Real-time data delivery through interactive dashboards, sophisticated filtering options, and user-driven ratings for better decision-making.
- AI-powered chatbot integration enables effortless interaction, offering instant responses and data retrieval for a personalized experience.
- Secure deployment via FileZilla, optimized for high-traffic scenarios and capable of handling large datasets with ease.

Acss

May 2023 - Jan 2024

- Acss is a telecommunication application that allows users to submit queries and manage credit approvals, with credits assigned by managers based on specific service regions and areas.
- Developed to efficiently track user-specific data tied to the client's network service regions, using React.js, Redux, JavaScript, HTML, CSS, and React Hooks.
- Contributed to unit testing using the Jest framework and shallow rendering, as well as configuring SonarQube for code coverage and overseeing production deployment.

Network Circuit Order

Aug 2022 - Apr 2023

- Network Circuit Order is a service-based client project designed to track location information based on the client network users.
- Developed using React.js, Redux, JavaScript, HTML, CSS, and React Hooks to create a dynamic and responsive interface.
- Contributed to security setup with Fortify, Sysdig, and Blackduck to ensure web application integrity, and set up SonarQube for code coverage analysis.

Vson

Jan 2021 - Jul 2022

- Vson is a service-based client project designed to track user registrations and statistics within the client's network.
- Developed an Admin Dashboard to simplify user data management, incorporating advanced search features for enhanced usability.
- Built using React.js, Redux, JavaScript, HTML, CSS, and React Hooks to ensure a dynamic and efficient interface.
- Contributed to security setup with Fortify, Sysdig, and Blackduck to ensure web application integrity, and set up SonarQube for code coverage analysis.
- Developed and executed integrated test cases to ensure seamless interaction between various components and modules in the React-based frontend application.

Truce

Nov 2019 - Dec 2020

- Truce is a technology solution provider for logistics, where I designed and implemented responsive UI components using React and Ant Design, along with centralized state management using Redux.
- Integrated Material UI and third-party APIs, including E-way bill integration, while focusing on performance optimization for enhanced application efficiency.
- Developed using React.js, Redux, JavaScript, HTML, CSS, Material-UI, and Ant Design to ensure a seamless and efficient user experience.

Simple Load Receipt

Sep 2018 to Dec 2020

- Simple Load Receipt is a technology solution provider for transporters, enabling efficient management of trip and load receipt information.
- Developed using React.js, Redux, JavaScript, HTML, CSS, Material-UI, and Ant Design to deliver a responsive and dynamic user experience.
- Collaborated with internal teams to roll out product features incrementally, ensuring alignment with user requirements.
